Title: Design and evaluation of a mobile application to assist the self-monitoring of the chronic kidney disease in developing countries

Version: 1  Date: 23 Nov 2017

Reviewer's report:

Thank you for the opportunity to review your revised paper titled 'Design and evaluation of a mobile application to assist the self-monitoring of the chronic kidney disease in developing countries'. The app itself addresses an inequity in care and has potential to improve the lives of those living in rural or more remote communities, and I enjoyed reading about how it has been developed and tested.

I commend you on your work to revise and strengthen the manuscript and I believe your revision has adequately addressed the reviewers' suggestions. As the app is still under development, it is particularly gratifying to see the limitations of the usability testing conducted on this app described in the discussion.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
