Reviewer’s report

Title: Initial Development of Supportive Care Assessment, Prioritization and Recommendations for Kids (SPARK), a symptom screening and management application

Version: 1 Date: 05 Nov 2018

Reviewer: Mohd Idzwan bin Mohd Salleh

Reviewer's report:

In general, the paper is good and has successfully addressed all the major comments required by the reviewers. The findings have an excellent number of new and important answers gathered from both qualitative and quantitative approaches, and the results are interesting and valid. More importantly, this paper has successfully contributed to the design of an innovative HIS product for earlier detection of cancer among children in efforts to reduce the rate of mortality and to increase the patient safety by most health institutions.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
Please indicate the quality of language in the manuscript:
