Reviewer’s report

Title: Harnessing mobile devices to support the delivery of community-based clinical care: a participatory evaluation

Version: 2 Date: 21 Jun 2019

Reviewer: Ming Huang

Reviewer's report:

The manuscript has been improved but the comments are partially addressed.

Although the authors employed a qualitative method to study challenges for using mobile devices to support clinical care delivery, 20 participants is really a very small sample size. The authors need to consider extend the sample size (e.g. 100) to cover various individuals for a solid research.

If there are more participants, the authors can perform content analysis with basic statistics for the results.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
Quality of written English
