Title: Characteristics of older adults using patient web portals to view their DXA results

Version: 1  Date: 06 Dec 2018

Reviewer: Stuart Speedie

Reviewer's report:

The authors have addressed all of this reviewers points in a reasonable manner. This reviewer does caution the authors that account activation is confounded with portal use to view DXA results as activation is a prerequisite for access. Consequently the logistic regression results could reasonably be associated with either account activation or viewing DXA results. This does not invalidate the results but rather points toward additional research that is required.
