Reviewer’s report

Title: Frequency of ubiquitous connectivity and associated factors among Mexican adolescents.

Version: 0 Date: 31 Oct 2018

Reviewer: Sisira Edirippulige

Reviewer's report:

Thank you for the opportunity to review this manuscript. The area of the examination is very interesting. Considerable capture of the population in the study is a strength of this work.

Some aspects to pay attention to:

- Title of the study does not reflect the scope of the work. It is best to revise to tell the story that you are intending to tell

- The researchers have used an online survey to assess the level of Internet use by the young people; this has been used to understand their level of online connectivity. However, it is hard to understand how these findings can be used to make the conclusions relating to mHealth. Methods do not describe how authors have associated the results with health related connectivity of young people based on the level of Internet use. This has to be explained.

I think this the most critical aspect to be addressed in the study and this has to be done in all sections - Intro, Methods, Results and Discussion.

I would be good to reflect this in the Intro; examine the literature to see if there has been previous studies to explore this question and if so how they have done that.

There is no doubt that the level of online connectivity is a prerequisite for online health promotion; however, there maybe some other factors that have to be taken in to consideration. These aspects have to be discussed.

As noted before, there must be a strong justification for using the 'level of connectivity as a means for m-Health/online health promotion'

It would be good to have a careful review of the manuscript for English expression. Language/expressions must be improved to fit standards of academic writing.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess
Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
Please indicate the quality of language in the manuscript:

Not suitable for publication unless extensively edited

Declaration of competing interests
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.

I declare that I have no competing interests.
