PEER REVIEWER COMMENTS:

GENERAL COMMENTS:
The paper needs to be edited by a native English speaker as it suffers from poor grammar.

What is an SEM? - it needs to be expanded upon first use as well as in the abbreviations list.

I'm not sure why "Intention to use" is set out the way it is in the title. The unusual markings need to be removed in the title and throughout the document.

Excellent response rate to the questionnaire.
Please expand upon the results of qualitative work. Given the amount of data collected this section seems somewhat sparse.

Please expand upon the conclusion. Expand upon your findings but also state where this research is leading to. What comes next?

This paper does not add anything novel or new to what is already known in the literature other than it confirms the same results are occurring in Ethiopia as in other developing countries. However, that in itself is of interest.

ADDITIONAL REQUESTS/SUGGESTIONS:
I'd like to see more words in the discussion session explaining the statistical results rather than repeatedly stating those same statistical results.
The references to other studies need to be cited.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
