Reviewer's report

Title: A process evaluation of a stroke-specific follow-up care model for stroke patients and caregivers; a longitudinal study.

Version: 3  Date: 2 June 2014

Reviewer: Karen Hoare

Reviewer's report:

Major revisions
Unfortunately this study does not adhere to questions one or two of the guidelines for review, i.e the question is not well defined. The assessment tool was being developed during the intervention which I believe was very confusing. The study does not adhere to question 2 of the guidelines because the methods are inappropriate. The study needs re-designing in order to be publishable.

Level of interest: An article of limited interest

Quality of written English: Not suitable for publication unless extensively edited

Statistical review: No, the manuscript does not need to be seen by a statistician.
