Reviewer's report

Title: Nurses’ knowledge and practice towards prevention of pressure ulcer is low in Gondar University Hospital, Northwest Ethiopia.

Version: 1 Date: 3 December 2014

Reviewer: Sedigheh Iranmanesh

Reviewer's report:

The topic is of value and would be of interest to readers of the journal. However, I think the manuscript needs revision and then resubmit.

Title
The title should be shortened and not included the result of study.

Abstract
Please include the aim of study in background.

Introduction
Including some literature and statistical information about pressure ulcer in the context would support the introduction.

Method
How the scale was developed and designed? Is it developed based on literature review, interview with nurses? or....
Please provide details about validity, reliability and translation process.
How did the scale scored? Please describe the scoring in part of instrument.
How did data collected? It is just stated that staffs were trained about ways of facilitating the data collection process.
In part of results, background items were reported. I would suggest to include information about the instrument consist of background information in part of instrument. What type of questions designed and how? Is it developed based on literature, authors’ experiences or...?
Results and discussion are interesting and well written.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
