Reviewer’s report

Title: Obesity prevention in early life: an opportunity to better support the role of Maternal and Child Health Nurses in Australia.

Version: 2 Date: 18 January 2015

Reviewer: reza negarandeh

Reviewer’s report:

Major Compulsory Revisions

Abstract:
1- Method: When was the study conducted? Grounded theory was treated as a research methodology, and I think that the authors used content analysis for data analyzing. Please clarify what did for data analysis actually and provide support for it.

2- results: Why not report the findings of qualitative data.

Methods:
1- I think this research used a mixed method? So why the authors did not use this label, needs to be explained.

Please see the following reference for more detail:
- Creswell and Plano Clark Designing and Conducting Mixed Methods Research

2- please add more information on how participants selected in qualitative phase.

3- You just mentioned assess of face validity, what about content validity and reliability of questionnaires?

4- The process of data analysis is not clear. Please make clear.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
