Reviewer’s report

Title: Cross-sectional examination of the association between shift length and hospital nurses job satisfaction and nurse reported quality measures

Version: 0 Date: 03 Apr 2017

Reviewer: Bronwyn Hayes

Reviewer’s report:

Thank you for your well written manuscript. Overall it is of high quality and I am unable to find anything of note to correct. My only concern is that I cannot see a point of difference between this paper and what has already been published on the topic of 8 versus 12 hours shift. It would be good if there was.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
