Reviewer’s report

Title: Enhancing utility and understanding of evidence based practice through undergraduate nurse education

Version: 1 Date: 11 Aug 2017

Reviewer: Konstantinos Antypas

Reviewer's report:

The authors have revised the manuscript and have addressed most of my comments. The comment regarding the choice of the Mann-Whitney test, its assumptions and its false presentation as a parametric test has not been addressed. This comment has been omitted from the table of changes that the authors have submitted so I don't know whether they disagree with my comment or they have forgotten it. Also some of the changes have affected the quality of the language of the manuscript, and some corrections are needed (for example the first paragraph of the discussion).

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
