Title: Awareness of professional rules among Iranian nurses: a cross-sectional study

Version: 3 Date: 04 May 2018

Reviewer: Theodore Cosco

Reviewer's report:

The majority of the major issues that were raised by reviewers have been addressed. The supplementary file providing the point-by-point response to comments was a valuable addition to the latest revision. There are still some formatting inconsistencies throughout and the language could be cleaned up for style (however, the latter is not essential). There are still a few minor issues to be addressed.

Minor

The decimal places vary from tenths to hundredths throughout. They should be consistent
