Reviewer’s report

Title: Professionals' experiences with pediatric colonoscopy: an interview study (Original Article)

Version: 1 Date: 06 Nov 2018

Reviewer: Reviewer 2

Reviewer’s report:

"REVISION ASSESSMENT FROM THE ACADEMIC PEER REVIEWER:

Has the author addressed your concerns sufficiently for you to now recommend the work as a technically sound contribution? No

Reviewer comments: While the content of the manuscript has certainly been improved and clarified, there are still some elements requiring attention.

In the abstract, the introduction is unnecessarily long, while the results section is rather short and could include a more thorough precis of the findings.

The introduction to the main paper is also quite lengthy and detailed. Some extraneous information could be removed, or perhaps shifted into the discussion.

The English language would still benefit from some further review and revision. it still comes across as rather 'clunky' throughout."

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
