Reviewer’s report

Title: Knowledge about the administration and regulation of high alert medications among nurses in Palestine: A cross-sectional study

Version: 0 Date: 19 Dec 2018

Reviewer: Edineis de Brito Guirardello

Reviewer’s report:

Dear Editor,

The objective of the study was to assess the level of knowledge of HAMs among nurses in government hospitals in West Bank, Palestine.

It is a well written study and follow the structures of a scientific study. In order to improve the manuscript, there are some questions and comments below:

Page 5; line 22 to 23: Why the use of 'a comparative cross-sectional design'?

Page, line 42 to 58: The authors should describe the methodological process used to translate and adapt the instrument 'Nurses' knowledge of HAMs' to Arabic culture.

In the Page 11, line 32 to 35: What means "legal nurses"? It should be explained because its meaning can be different from others countries.

Sincerely yours

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
