Reviewer’s report

Title: Incidence and Predictors of Groin Complications Early after Coronary Artery Intervention: A prospective Observational Study

Version: 1 Date: 03 Dec 2018

Reviewer: Geraldine Lee

Reviewer's report:

Please include all comments for the authors in this box rather than uploading your report as an attachment. Please only upload as attachments annotated versions of manuscripts, graphs, supporting materials or other aspects of your report which cannot be included in a text format.

Please overwrite this text when adding your comments to the authors.

Most of the comments seem to have been addressed, however there was no attachment demonstrating the comments to reviewers' comments so I was unable to see it and had to rely on the highlighted changes in the text.

However a few minor points:

In the abstract: 'Females and participants aged more than 65 years were approximately double the time more likely to develop groin complications' - reword as this doesn't read well.

Methods: These are fellows NOT follows. (p. 8, line 12)

P. 10, line 54- 'Data were verified by the cardiologist in the unit who is available' change to 'who was available'

p. 19, line 41. Change 'Newer studies' to 'New studies'
Table 2, numbers are on wrong line: 234 should be beside the 78%

Normal
Overweight and obese
28.96 ± 4.96
66 (22%) 234
(78%)

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.
Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.
Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.
Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
Not relevant to this manuscript

Quality of written English
Please indicate the quality of language in the manuscript:
