Reviewer’s report

Title: Specialty cardiac nurses' work satisfaction is influenced by the type of coronary care unit: A mixed methods study

Version: 1 Date: 18 Feb 2019

Reviewer: Juan Leyva-Moral

Reviewer's report:

Thank you for giving me the opportunity to read again this interesting paper. Authors have made some changes that, under my opinion, make more clear the study. There are some other suggestions that have not been included and authors provide robust rationale for not accepting my suggestions. I have to admit that the comments in the "response to reviewers" letter clarify all my doubts, although in the paper may not be so clear. The feedback I gave was not to be accepted as mandatory, there were just comments to make the paper more clear. I repeat, the authors have given enough arguments in the letter for the decisions taken. We may agree or disagree in, for example, the use of the ver "explore" but it is true that they cannot change it one the study is finished and this is clearly stated it the letter.

In conclusion, good job and congratulations.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
