Reviewer's report:

Dear authors, thank you for the revisions of your paper, which I find very good and carefully conducted. Please look through the abstract to see if anything should be revised in order to match the main paper, e.g. to mention what kind of misconceptions this is about. I have few comments. You have explained about the young age of nursing students, and that is fine. However, how can you say that the nurses students participating were senior, when a few were 17 and 18 years? These participants cannot have been senior. Another comment is if you translated the questionnaire into local language and if yes, how was this done? if not, did the nursing students have any troubles with the English language?

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.
