Reviewer’s report

Title: Advanced Practice Nurses in Primary Care in Switzerland: An Analysis of Interprofessional Collaboration

Version: 1 Date: 05 Dec 2019

Reviewer: Renée Allvin

Reviewer's report:

The authors have commented on, and revised parts of the text in accordance with reviewer comments. I have a few more questions/comments:

BACKGROUND: The rationale is further developed. However, I suggest the authors to consider placing rationale and aim at the end of the background text. The aim is rewritten, however, I still wonder if the purpose is to describe, explore, or investigate …? The authors use "explore" later on in the text.

METHODS:
Setting and participants: Page 8, line 21-22, P 9, line 1-6, is about Data Collection. Reliability: Reliability is a quantitative research terminology. For qualitative research the terminology should be consistency

FINDINGS: Isn’t the findings from the observations included in the presentation of the themes?

DISCUSSION: Interesting and well-written.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
