Reviewer's report

Title: Patient perspectives on continuity of medication management: Results of a qualitative study

Version: 2 Date: 25 July 2014

Reviewer: Hana Morrissey

Reviewer's report:

Major compulsory revision:
1. Indicate the population in the title
2. Indicate if ethics approval was gained and from where
3. Replace, some and all by % out of total sample
4. Exclude the one women data as it does not represent female population, when trending by gender
5. Exclude specialists data as it is recommended that people with chronic diseases see specialists at least once a year, globally
6. Conclusion need to reflect the objective, i.e. no mention to adherence to therapy or patient outcomes

Minor essential revision: see attached scanned copy

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
