Reviewer’s report

Title: Community health worker interventions to improve access to health care services for older adults from ethnic minorities: A systematic review

Version: 2
Date: 28 April 2014
Reviewer: Arnoud P Verhoeff

Reviewer’s report:

Relevant paper.

Minor Essential Revisions:
1) Discussion: a limitation to add is the fact that - apart from the small number - all studies were conducted in the US. This is relevant to the question if the results of these studies can directly be 'translated' into the context of other Western countries. This is questionable.
2) Conclusion: I suggest to reframe the main conclusion: replace 'is likely' by 'might be'. The evidence provided by the small number of studies is not so strong.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
