Reviewer’s report

Title: Is practice of routine episiotomy changing? A cross-sectional study comparing two types of hospitals from 2007 to 2012 in Catalonia

Version: 1 Date: 30 October 2014

Reviewer: Vasanth Andrews

Reviewer’s report:

Major revisions
1. The methods need to be succinct
2. Results the tables are too complicated and must be simplified.
3. Results section needs to provide more information in an accurate and digestible form.
4. The conclusions need to be focused on the results.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, and I have assessed the statistics in my report.
