Reviewer's report

Title: Integrating an infectious disease programme into the Primary Health Care service: A retrospective analysis on Chagas disease community-based surveillance in Honduras

Version: 3 Date: 29 September 2014

Reviewer: Steffen Flessa

Reviewer's report:

The paper has strongly improved. However, it still focusses too much on implementation and policy (as a consultancy paper). I miss a stronger methodology section, incl. a more detailed analysis where the data comes from.

The costing section is insufficient. We have to know much more about the cost and cost-effectiveness of this and alternative approaches.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
