Reviewer's report

Title: Barriers to diabetic foot care in a developing country with a high incidence of diabetes related amputations: an exploratory qualitative interview study

Version: 3  Date: 13 March 2015

Reviewer: Nicholas Tentolouris

Reviewer’s report:

This is a small descriptive study with limited data to report and to analyze in a scientific way. Reporting thoughts and wishes does not offer scientific knowledge and offers little help in sorting out the problem of the diabetic foot.

Level of interest: An article of insufficient interest to warrant publication in a scientific/medical journal

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:

I declare no conflicts of interest.
