Reviewer's report

Title: Making sense of a new technology in clinical practice: a qualitative study of patient and physician perspectives

Version: 1 Date: 20 May 2015

Reviewer: Ajaykumar Rao

Reviewer's report:

The authors of this manuscript utilize the CAN assessment as a framework for understanding the role of new technologies in the clinical space.

Overall, I felt that the manuscript was well-written and provided an interesting glimpse into providers' problems with new technologies. Providers understand the important role of CAN but realized challenges in implementing use of the CAN with their patients.

I think this, in itself, is an important finding.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
