Reviewer’s report

Title: Community paramedicine model of care: an observational, ethnographic case study

Version: 2  Date: 27 May 2015

Reviewer: Tadashi Takeshima

Reviewer’s report:

This paper is important for the development of community paramedicine. However, there is no clear description of community paramedicine, and there exists unstable structures in the description of results and discussion. I also find sentences which should be written in discussion. This paper should be extensively edited to be suitable for publication.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Not suitable for publication unless extensively edited

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I have no competing interests in relation to this paper.
