Reviewer’s report

Title: Introducing Leprosy Post-Exposure Prophylaxis into the Health Systems of India, Nepal and Indonesia: A case study

Version: 0 Date: 23 May 2017

Reviewer: MALCOLM DUTHIE

Reviewer’s report:

A well presented and important summary of early activities relating to the incorporation of PEP within leprosy control programs across 3 countries is provided.

Minor comment:

page 11, line 9 - reference to the earthquake in Nepal should be given more detail (i.e., date etc.), as this will make it more relevant to readers unaware of this event or when knowledge of it becomes diminished over time.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
