Reviewer’s report

Title: Evaluation of a multicomponent pathway to address inpatient delirium on a neurosciences ward

Version: 2 Date: 18 Dec 2017

Reviewer: Long H Ngo

Reviewer’s report:

The authors have made a tremendous effort to do major re-analyses of these data. I appreciate very much seeing the revised results, and I would like to thank the authors and the editorial staff for the opportunity to look at this paper one more time. It is an important piece of work in the area of delirium research and the authors have done a great job on this revision. I have no further comments, and would gladly recommend that the paper be published.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
