Title: Oncology nurses' beliefs and attitudes towards the double-check of chemotherapy medications: A cross-sectional survey study

Version: 1 Date: 16 Sep 2016

Reviewer: Alissa L. Russ

Reviewer's report:

It was difficult to assess the revision without reference to any page numbers where changes were made. The authors responded to the comment about "every second nurse" but no changes were made to the manuscript itself. This needs to be addressed for other readers. The authors adequately responded to my other review comments and made appropriate changes to the text.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.
Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.
Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.
Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
