Reviewer’s report

Title: Beyond coverage: Improving the quality of antenatal care delivery through integrated mentorship and quality improvement at health centers in rural Rwanda

Version: 1 Date: 15 Dec 2017

Reviewer: Omar Da'ar

Reviewer's report:

Review for BHSR-D-17-01105R1

The manuscript is well written and authors have addressed adequately the objective and comments of reviewers. However, authors will greatly improve their paper if:

Discussion

a) Elaborate their discussion section. It looks terse to me, results were not adequately addressed in light of the literature.

b) In the discussion, they add a paragraph on how their work potentially contributes to the literature or context.

Conclusion

a) The conclusion is too short. They need to recapitulate their main finding and how they arrive at, as well as highlight some implications on how the effect of the MESH-QI for different intervention districts.

b) I believe the authors will greatly improve their paper if they offer some recommendations, especially on future research based on the limitations they put forth.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No
Are the conclusions drawn adequately supported by the data shown?  
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?  
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
