Reviewer’s report

Title: Community Mobilization and Maternal Care of Women Living With HIV in poor settings: The case of Mfuwe, Zambia

Version: 2 Date: 07 Aug 2017

Reviewer: Basile Keugoung

Reviewer's report:

Dear Authors,

Thank you for revising the manuscript. I do recognize that the quality of the Manuscript has significantly improved.

I have just few minor revisions that are listed below/.

Best regards

Data collection method

I propose to rephrase the paragraph as follow:

Data collection consisted of three FGDs all involving 37 HIV positive women who had experienced one or more of the components of community mobilization. The first FGD focused on peer support and had 13 participants, the second one on utilization of indigenous resources had also 13 participants, and the last one on community involvement had 11 participants.

Analysis

I suggest this:

... after which, we used the software NVivo 10 QSR International® to conduct thematic analysis.

Conclusion

Replace clichés by stigma
Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
