Reviewer’s report

Title: Does multidisciplinary rehabilitation of tortured refugees represent ‘value-for-money’? A follow-up of a Danish case-study

Version: 0 Date: 13 Nov 2017

Reviewer: Emmanuel Kabengele Mpinga

Reviewer's report:

1. I welcome this study for two reasons: (i) the paucity of economic studies in torture studies (ii) the efforts made by the authors.

2. Two points are crucial here (i) the title is not adequate- Traumatized refugees are not tortured refugees; trauma in migration will be generated by others factors than torture. (ii) The follow up during 2 years is not a long term follow up. So, to be more precise and focused the title will be: " Does multidisciplinary rehabilitation of tortured refugees represent value for money: " A follow up of a Danish case study.

3. In Methods section: what where the countries of origin patients of patients in the waiting list? The same than the control group?

4. In the limitations section : what where the social on economic changes in the country that would have probably affected the refugees care?

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
