Reviewer’s report

Title: Improved Performance of District Health Systems through Implementing Health Center Clinical and Administrative Standards in the Amhara Region of Ethiopia

Version: 1 Date: 03 Jan 2019

Reviewer: Trisasi Lestari

Reviewer's report:

This is an important study that can be a good example for quality improvement initiative in health sector.

I have only one comment:

In the results, page 8 line 350 - 358, it is showed that improvement in standard performances were ranged between 4-7%. It is statistically significant, but maybe not much different than before. In several areas, the achievement was only about 50%. Could you discuss why the changes were only between 4-7%?

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
