Reviewer’s report

**Title:** Explaining patient delay in healthcare seeking and loss to diagnostic follow-up among patients with presumptive tuberculosis in Tanzania: A mixed-methods study

**Version:** 1  **Date:** 23 Feb 2019

**Reviewer:** Reviewer 2

**Reviewer's report:**

**REVISION ASSESSMENT FROM THE ACADEMIC PEER REVIEWER:**

Has the author addressed your concerns sufficiently for you to now recommend the work as a technically sound contribution? Yes

Reviewer comments: The authors have attended to all comments made on earlier version as minor issues aimed to improve readers’ comprehension. The authors have carefully made changes to the manuscript and highlighted them in the revised version. There are sufficient details in the title and methods to indicate that the study adopted a mixed-methods approach as the authors also used Weiss MG as the main citation for the methodology they adopted. Authors are justified not to have another subheading explaining qualitative methods. I have no further comments on this version.

**Are the methods appropriate and well described?**
If not, please specify what is required in your comments to the authors.

Yes

**Does the work include the necessary controls?**
If not, please specify which controls are required in your comments to the authors.

Yes

**Are the conclusions drawn adequately supported by the data shown?**
If not, please explain in your comments to the authors.

Yes

**Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?**
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
