Reviewer’s report

Title: Effect of a typical systemic hospital reform on inpatient expenditure for rural population: the Sanming model in China

Version: 2 Date: 01 Feb 2019

Reviewer: Reviewer 2

Reviewer's report:

"REVISION ASSESSMENT FROM THE ACADEMIC PEER REVIEWER:

Has the author addressed your concerns sufficiently for you to now recommend the work as a technically sound contribution?

Yes

Reviewer comments: The authors addressed most of the reviewer's comments except a few issues:

1. Although the authors added length of stay as an outcome, they didn't revise the manuscript thoroughly to reflect it. For example, in the abstract, they only mentioned the financial burden in the background. They didn't update the results of OOP with the exclusion of LOS from the model. Therefore, the authors need to carefully revise the paper to reflect that LOS is another outcome in the study.

2. Abstract, methods. The authors didn't mention the fixed effects, clustering effects, and robustness check.

3. Line 171, length of stay is no longer the co-variate. Please remove it.

4. Line 234, since length of stay was removed from the co-variate, the results should be different.

5. Line 245. remove ""robust"

6. Results section should mention the specific numbers in the tables.

7. Table 3 & 4 have different fonts."

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No
Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
