Reviewer’s report

Title: Qualitative and quantitative research of medication review and drug-related problems in Hungarian community pharmacies: a pilot study

Version: 0 Date: 15 Jan 2019

Reviewer: Attila Nagy

Reviewer's report:

The aim of the study is to perform a pilot of medication review in Hungarian community pharmacies, a DRP classification was applied for the first time; the qualitative and quantitative description of the discovered DRPs, and of the interventions for their solution in order to prove the safety relevance of the service and to map out the competence limits of GPs and community pharmacists to drug therapy.

In my opinion, the paper is well written and contributes to the existing knowledge. I could not find any logical errors in the presentation and the approaches used.

I have provided my comments/questions for consideration:

1. There are some minor issues with the language of the manuscript. (e.g., „data was“; starting sentences with numerals)

2. In Table 1 „SD" in smissing from legends.

3. The sum of percentages in Table 1 is close to 100%, but not exactly. (rounding minor issues)

4. Issues with statistical terminology: two-sample t-test (not probe); there is no correlation t probe (Pearson's correlation coefficient (PCC))

5. What are the p-values for PCCs?

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes
Are the conclusions drawn adequately supported by the data shown?  
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?  
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English  
Please indicate the quality of language in the manuscript:
