Reviewer’s report

Title: Nursing and midwifery research activity in Arab countries from 1950 to 2017

Version: 1 Date: 12 Jan 2019

Reviewer: Peter Kokol

Reviewer's report:

Authors made almost all the necessary amendments to the manuscript. Anyhow I would advise the authors to extend the thematic analysis of the keywords network, by reducing the occurrence frequency of keywords, thus including more keywords into the analysis. Once again I would suggest to remove the country names from the network, except if they contribute to the analysis. For example (blue cluster): … Saudi Arabia nursing research is mostly related to stress and nursing education.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
Quality of written English
