Reviewer’s report

Title: Evaluating Medicine Prices, Availability, and Affordability in Bangladesh Using World Health Organization and Health Action International Methodology

Version: 0 Date: 03 Oct 2018

Reviewer: Enrique Seoane-Vazquez

Reviewer's report:

Methods

Describe in more detail the methods used for the regression analysis and the selection of the model.

Page 8. Line 323. The authors used MPR median values for the descriptive analysis and mean values for the inferential analysis. The inferential analysis should be conducted using median values.

Results

Include the full results of the regression analysis.

Page 8. Line 339. Availability of medicines. Indicate if the differences were statistically significant.

Minor recommendations

Use lower case for generic names.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No
Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
Please indicate the quality of language in the manuscript:
