Title: Evaluating Medicine Prices, Availability, and Affordability in Bangladesh Using World Health Organization and Health Action International Methodology

Version: 1 Date: 20 May 2019

Reviewer: Enrique Seoane-Vazquez

Reviewer's report:

The manuscript address an important public health problem. I only have the following minor comments.

Abstract.

Spell "NCD" and do not capitalize the first letter of generic names bisoprolol, metformin and atorvastatin.

Results.

The regression results do not indicate the distribution of the price data. The results section should include a sentence confirming that the price data was normally distributed.

Line: 346. The use of the terms "mean (median)" is confusing. Is this the average of median prices? Please clarify.

Limitations: Include the main limitations of the study.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
