Reviewer's report

Title: Service use, unmet needs, and barriers to services among adolescents and young adults with autism spectrum disorder in Poland

Version: 0 Date: 10 May 2019

Reviewer: Steven Merahn

Reviewer's report:

These reports are very important to understand the inter-national and cross-cultural nature of ASD's effects on family and community beyond early childhood; and an excellent idea to subset out the age cohorts from the Polish Autism Survey and explore the current state of the 'transition to adulthood". On a minor note, the manuscript could use one more round of editing: for example: "As pointed (out) by Shattuck and colleagues (Shattuck et al., 2012) most of the studies on..." could be simplified to: "Many studies (Shattuck et al., 2012) on..." -- this would make your findings more accessible to the reader.
