Title: Impact of the Dementia Care in Hospitals Program on Acute Hospital Staff Satisfaction

Version: 1 Date: 18 Jun 2019

Reviewer: Marie Boltz

Reviewer's report:

This is well-written manuscript reporting on a pragmatic trial that examined the implementation of an educational program focused on dementia care in the hospital setting.

The case for the program and study are well made. Methods are appropriate. Results are clearly presented and discussion flows logically.

In this revision, the authors have responded adequately to the reviewers' recommendations.

The only issue that I have is that the psychometrics of the staff satisfaction survey were not reported. I recommend reporting these or if not done, describing this as a limitation.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.
