Reviewer’s report

Title: Cost-effectiveness of the SLIMMER diabetes prevention intervention in Dutch primary health care: economic evaluation from a randomised controlled trial

Version: 0 Date: 14 May 2018

Reviewer: Andres Berruti

Reviewer’s report:

Please include all comments for the authors in this box rather than uploading your report as an attachment. Please only upload as attachments annotated versions of manuscripts, graphs, supporting materials or other aspects of your report which cannot be included in a text format.

Please overwrite this text when adding your comments to the authors.

The manuscript is clear and well written. a couple of minor comments:

- Consider using a comma after i.e.,

- consider using commas instead of parentheses once parentheses has been used. Too may levels of parentheses is confusing.

In addition in the method section 2.6.4 intervention cost:

- Please consider describing why that methodology was selected.

- Are there any other cost that are not included (e.g., transportation, communication, building, etc.)? If yes, please indicate why they are not included.

- Were all the participants arrive at the beginning of the intervention or during the time of the intervention. Please make sure that the numerator is comparable with the denominator (i.e., flow vs stock variable).

Finally, in Table 1:

- Please describe what is included in the education levels.

- Please consider changing the word ethnicity for word that more appropriately describe the variables.

- Do you mean full time job by paid job? Please clarify.
Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
