Reviewer's report

Title: Enabling Public, Patient and Practitioner Involvement in Co-Designing Frailty Pathways in the Acute Care Setting

Version: 1 Date: 06 Jul 2019

Reviewer: René Melis

Reviewer's report:

Please include all comments for the authors in this box rather than uploading your report as an attachment. Please only upload as attachments annotated versions of manuscripts, graphs, supporting materials or other aspects of your report which cannot be included in a text format.

Please overwrite this text when adding your comments to the authors.

I have read the rebuttal of the authors and I feel that the work has not improved as much as would be expected when the rating of a major revision is advised (as I did, I believe). Specifically, my main comment that the research question is unclear and that paper presents a combination of experiences/lessons learned re the co-design process itself and the outcomes of the co-design process is not addressed. The response of the authors that in co-design process and outcomes are intricately related I agree with, but that does not mean that the authors cannot and should not be more clear about the rationale for this paper and whether their research question is about whether they wanted to learn about co-design as a methodology or about the outcomes of a co-design process. These are completely different RQs with completely rationales. In this it is a pity that the authors decided not to respond to several of the comments I had initially and that I still have.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
Quality of written English
Please indicate the quality of language in the manuscript:
Acceptable

Declaration of competing interests
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.
