The authors have done well in revising the manuscript. I only have few more comments to improve the discussion part of this manuscript.

1. How is the role of contact investigation and preventive treatment in nursing homes and other health facilities?

2. Is there any issues with use of new TB diagnosis methods which offer shorter waiting time to get result?

3. Is potential transmission in the community due to longer HSD associated with TB incidents in the district?

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.
