Reviewer’s report

Title: Evaluation of the impact of a brief educational message on clinicians’ awareness of risks of ionising-radiation exposure in imaging investigations: a pilot pre-post intervention study

Version: 0 Date: 26 Sep 2019

Reviewer: Dean Whitehead

Reviewer's report:

Many thanks for this succinct and well crafted manuscript. It is a logical and straight-forward survey design study that does exactly what it needs to. I only have two recommendations. First, that some parts, especially the conclusion, are too succinct. A little more emphasis - such as recommendations form practice would assist. Secondly, I'm a little uncomfortable with the direct naming of a service within a specific hospital. I would prefer to see naming along the lines of being 'situated in a regional healthcare Trust.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
