Reviewer's report:

REVISION ASSESSMENT FROM THE ACADEMIC PEER REVIEWER: Has the author addressed your concerns sufficiently for you to now recommend the work as a technically sound contribution? No

Reviewer comments: The revision appears to be mainly cosmetic, with textual changes only. Given the stated aims of this study, I do not think that there is any evidence that the clinical consensus group added much value to your study, over and above intelligent computing: see my previous comments, points 1 and 3, and your responses.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
