Manuscript Title: Clinical facilities and staff communication skills influence care attendance in Saudi Arabia

The reviewer's comments:
Overall, I recommend that this manuscript requires major correction before resubmission.

1. Table 1:
1) Table 1 added up to 241 individuals, but your abstract stated 242 pregnant women. Which one is correct?
2) The "N" in the Table heading should be non-capitalized small "n" for subgroup sample.
3) The percentage in the "Missed" Column and "Attended" Column should be column percentage, such than the column percentage for each variable should add up to 100%.

2. Table 3: Please also show n (%) for every bivariate analysis of chi-squared test, not only the chi-squared value. Correct p=1.19 for age.
3. Table 4: Please show mean (SD) for every bivariate analysis of t test, not only the t-value.

Are the methods appropriate and well described?
