Title: Perceptions of Brazilian Nursing Faculty members regarding Literacy of Human Rights related to Health in Nursing Undergraduate Programs

Version: 0 Date: 27 Mar 2018

Reviewer's report:

My only is concern is about the article objectives which, in my view, are not well described. The authors assert that the study "aims to explore the intersection of human rights to health and development as global health competency for nursing." This is quite vague as an article objective and do not really reflect the article conclusions. It is my understanding, taking into account the conclusion, that the authors aimed at investigating/evaluating the need/importance to include the study of international human rights, especially those related to health, in nursing curricula/competency in Brazil.

For these reasons I recommend the authors to clarify the aim/objective of the article in order to reflect and be coherent with the conclusion.
