Reviewer's report

Title: Diabetes, Epidemiological Transition and Health Care Costs in Latin America: Greater Preventive Medicine.

Version: 1 Date: 27 May 2014

Reviewer: Juan-Manuel Anaya

Reviewer's report:

This is a personal view (commentary) supported by some references about the epidemiological status of Type 2 Diabetes Mellitus in Latin America, focusing on the need for prevention. Although the manuscript is well written some redundancy exist. In addition, there are several recent papers that could help to argue the author opinions. Conclusions are too long and may be splitted in two. First, "Perspectives" and then "Conclusions".

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
