Reviewer’s report

Title: Diabetes, Epidemiological Transition and Health Care Costs in Latin America: Greater Preventive Medicine.

Version: 1 Date: 3 June 2014

Reviewer: Timothy Dall

Reviewer’s report:

Major Compulsory Revisions:
1. This paper contains a nice summary of diabetes-related issues and recommendations pertaining to Latin American countries. However, the paper needs to be edited by someone with fluency in technical writing. Many of the sentences are awkward, which makes it difficult to read.

Minor Essential Revisions: In paragraph 1, I think the number is probably 285 million adults rather than 285 trillion.

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I provide paid consulting services to governments, associations, and private companies, including pharmaceutical companies that produce diabetes supplies.
