Title: Risk of Violence from the Man Involved in the Pregnancy after Receiving or Being Denied an Abortion: A Longitudinal Study

Version: 1 Date: 6 July 2014

Major Compulsory Revisions - none

Minor Essential Revisions -
I believe a limitation of the study is that information about the behavior of the man involved in the pregnancy is being reported by the woman who is being abused. This is a highly emotional topic and self-report itself can be biased. Nothing can be done to change the methods, but it can be noted that there may be a bias in collecting the data in this manner.

Discretionary Revisions -
The title seems somewhat wordy or clumsy. Is there a way to make it more succinct?

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
